

The pending action on allowing broadcasters to increase the number of outlets they own/control nationally and in individual markets is a significant concern to me. Recently I have found myself seeking perspective from multiple US and international media websites to ensure I have a balanced perspective on important events. It is increasingly difficult to find non-redundant reporting in the US, even in a major city with multiple news sources. I ask you to reject the proposed changes in broadcast ownership contained in Docket 02-277.
